

## **Gorilla Logic Announces Release of FlexMonkey 1.0, An Open Source Tool for Testing Adobe® Flex® RIAs**

*FlexMonkey Brings the Power of Professional Record/Playback Test Automation Tools to Adobe Flex Development*

**Broomfield, CO – July 14<sup>th</sup>, 2009** – Gorilla Logic, the firm known industry-wide for **providing “gorilla” consultants that deliver a 10X productivity improvement over other options**, today announced the release of FlexMonkey 1.0. Flex Monkey, an open source testing tool for optimizing automated and unit testing of Adobe Flex RIAs, is another example of Gorilla Logic’s commitment to assisting clients and the market in developing the highest-quality applications possible.

”Adobe Flex is the leading standard for enterprise RIA development. When developing Flex-based mission-critical systems for our clients, we needed a production-quality testing tool that would tightly integrate with Flex Builder and FlexUnit,” said Eric Owens, FlexMonkey Product Manager. “FlexMonkey 1.0 is the answer to that need: by automating our interface testing with record/playback functionality, we provide higher quality solutions to our clients. We feel strongly that FlexMonkey should be free and open-sourced, and we're now providing clients with FlexMonkey training as well as FlexMonkey-based testing services.”

Available since October 2008, Gorilla Logic has used FlexMonkey with a diverse set of clients in a variety of industries ranging from financial services to aerospace to media. During each project FlexMonkey has been an integral part of Gorilla Logic’s quality assurance for clients. Based on this proven value and their unique experience Gorilla Logic is now offering [FlexMonkey Training](#) as well as [Testing Services](#) for Adobe Flex applications.

“We have been using FlexMonkey since October 2008 to test our Flex Applications interactively. We evaluated several interactive testing tools, and found FlexMonkey to be much lighter and more agile than the expensive products, even outperforming them in several areas. It is a great product, and the support from the Gorilla Logic team has been superb.” Tracy Ellis, Manager, SAS ([www.sas.com](http://www.sas.com)).

FlexMonkey 1.0 is an open-source solution and can be downloaded from [flexmonkey.gorillalogic.com](http://flexmonkey.gorillalogic.com). For questions regarding Adobe Flex training / mentoring, functional and load testing using FlexMonkey or other off-shore testing services provided by Gorilla Logic, please visit our website ([www.gorillalogic.com](http://www.gorillalogic.com)) or send an email to [info@gorillalogic.com](mailto:info@gorillalogic.com).

### **About Gorilla Logic**

Gorilla Logic is an enterprise application development services and consulting firm known industry-wide for providing “gorilla” consultants that deliver a 10X productivity improvement over other options. With

industry-leading expertise in Java-related technologies and Adobe Flex RIA application development, Gorilla Logic has been engaged by Fortune 500 companies in industries ranging from financial services to entertainment to aerospace and government to work on mission critical projects. Gorilla Logic also develops tools to decrease the product development lifecycle and open sources them for the benefit of the market – FlexMonkey ([flexmonkey.gorillalogic.com](http://flexmonkey.gorillalogic.com)) and OpenGXE ([www.gorillalogic.com/opengxe](http://www.gorillalogic.com/opengxe)).
