

## **GORILLA LOGIC NAMES JAVA EXPERT AND IT INDUSTRY THOUGHT LEADER ERIC BRUNO AS SENIOR SOFTWARE DEVELOPER**

*Bruno to leverage 15 years of Java expertise to assist enterprise IT clients with complex and challenging software development projects*

BROOMFIELD, Colo., June 23, 2011 – Gorilla Logic, ([www.gorillalogic.com](http://www.gorillalogic.com)), a leader in enterprise application development services and creators of open source test tools for mobile and rich Internet applications, today announced it has added Eric Bruno as its senior software developer for the company. Bruno will lead Gorilla Logic's efforts related to addressing enterprise customers' ongoing software services needs and manage implementation teams to further enable developing state-of-the-art applications.

“We are extremely pleased to have Eric join our team as we pursue our mission to deliver software that exceeds clients' expectations on time, on budget and that works – first time, every time,” said Stu Stern, CEO of Gorilla Logic. “Eric's contributions to the Java community are unmatched and we look forward to sharing his expertise with our enterprise client base.”

Prior to joining Gorilla Logic, Bruno was a client principal at Allure Technology where he was responsible for overseeing software solution architecture and product development. Prior to his position at Allure, he was a ‘Java Geek’ for Oracle. In more than 20 years of software development experience, Bruno has worked as a developer on large scale systems, acted as technical advisor, chief architect, and led global teams of developers. He has been involved in all aspects of software development, from requirements gathering, to testing and Quality Assurance (QA). Bruno is especially well known as the author of several acclaimed books focused on Java development. These titles include, *Java Messaging*, *Real-Time Java Programming* and *JavaFX*. Bruno also is a contributing editor to *Dr. Dobbs Journal* and the ‘Guru’ for the Dr. Dobbs Online Java Blog (<http://drdobbs.com/java>). He has published hundreds of articles and technical publications under his name.

Gorilla Logic continues to be an industry leader in developing open-source automated testing tools for emerging development platforms. In addition to FlexMonkey, Gorilla Logic recently released FoneMonkey 5.0, bringing record-and-playback automated testing capabilities to the iPhone and iPad

for the first time anywhere. Gorilla Logic's open source testing tools have grown out of the company's extensive experience providing mobile, web and rich Internet application development services to customers, from Fortune 500 companies to next-generation Internet start-ups.
