

GORILLA LOGIC NAMED AS FINALIST FOR BOULDER COUNTY BUSINESS REPORT'S IQ AWARDS

Company selected as finalist for most innovative software product

BROOMFIELD, Colo., Aug. 17, 2011 – Gorilla Logic, (www.gorillalogic.com), a leader in enterprise application development services and creators of open source test tools for mobile and Rich Internet Applications (RIA), today announced it has been selected as a finalist in the software category for the 2011 Boulder County Business Report's IQ Awards. Presented by the "Boulder County Business Report," the IQ Awards recognize the most innovative companies and organizations in the area. The awards ceremony will take place August 24, 2011 at the Boulder Theater, 2032 14th St. in Boulder.

Gorilla Logic continues to lead in developing open-source automated test tools for emerging development platforms. The company's open source testing tools have grown out of its extensive experience providing mobile, web and RIA development services to customers, from Fortune 500 companies to Internet start-ups.

"We are thrilled to receive local recognition for our innovation within the software category, and it is an honor to be included among such a large and distinguished group of innovators," said Stu Stern, CEO and co-founder of Gorilla Logic. "We appreciate the great work the Boulder County Business Report does in highlighting the robust market for innovation in the Boulder Valley."

This year, BCBR received nearly 60 nominations from companies in the Boulder Valley and selected three finalists in each of 10 business categories. Gorilla Logic is recognized in the IQ Awards' software category for FlexMonkey, an open source automated testing tool for Adobe Flex and AIR. FlexMonkey is the most widely used open source tool for testing Adobe Flex and AIR applications. With more than 11,000 downloads, FlexMonkey has established itself as the de-facto standard in the industry. It allows developers and testers of Rich Internet Applications to record, playback and verify real-world user interactions. If desired, the test automation tool can also generate ActionScript test scripts that teams can easily use within a continuous integration

environment. Gorilla Logic created FlexMonkey in 2008, and continues to contribute to the Flex ecosystem with ongoing enhancements and dedicated support to the community.
